Meeting Preparation Guidelines

1. Agenda Structure

Start with high-priority and overdue actions. Include the action description, owner, status, and due date.

2. Time Boxes

Allocate 10 minutes per agenda item. Never exceed the available meeting duration. Defer lower-priority items when time is insufficient.

3. Decision Logging

Record decisions only when supported by the source notes. Do not invent decisions or attendees.

4. Conflicting Sources

If meeting notes say an action is complete but the tracker says Open, flag the discrepancy. Never change tracker status automatically.

5. Missing Notes

If meeting notes are missing, state this clearly and prepare the brief using available project updates and the action tracker.
